

KROLL ATLASES (1"=200') – AVAILABLE BY PAGE OR FULL ATLAS

Note – In most cases these historical atlases can not be assigned a specific date since with each atlas there was an original compilation date (that may have included a field inspection) and from that point in time, only certain elements of the mapping was maintained (e.g. new plats, corporate limits). Thus each atlas represents a range of time. Dates have been estimated in most cases.
